

Name of the course	Faculty of Medicine English Division
Level and form of studies	Uniform full-time Master's studies
Course description	<p>The medical faculty of the ED trains future doctors whose task is to care for human health and life. The educational concept not only takes into account the preparation of the young person for social and professional life in a rapidly changing reality. It also attaches importance to the teaching of basic workshop skills, as well as to the awakening of research interests and the development of an attitude that is open to a variety of methodological approaches. The curriculum of the medical degree programme of the ED coherently combines theoretical issues with practical classes taking into account the current state of knowledge and guarantees a uniform scope of training in the medical profession. In the process of evaluating the selection of curricular content, the opinions of students obtained during surveys conducted after each semester are also taken into account. The selection of the implemented curricular content is enriched and supplemented with the latest scientific solutions. The language of instruction is English.</p>
Graduate profile	<p>Graduates of the Faculty of Medicine receive a diploma and the professional title of a doctor. After graduation, they take the Medical Final Examination and, upon passing it, they obtain the right to practice medicine, which entitles them to work in health care institutions, R&D and academic centres as well as clinics at medical universities. Completion of the studies enables the students to improve their qualifications, knowledge and skills within medical specialisations and supplementary and further training courses in various medical fields, as well as to continue their education in third-level (doctoral) studies.</p>
