METHODS OF INSTRUCTION						
Discussion, individual work of a PhD student.						
COURSE CONTENT						
<p>Semester I</p> <p>A doctoral student prepares a doctoral dissertation under the supervision of a supervisor. In consultation with the supervisor, he develops one or two chapters in a convenient order, depending on the dynamics of queries, other scientific, didactic and organizational activities, and depending on random events. The doctoral student is critical of his own findings, supplementing and correcting them many times if necessary. In consultation with the supervisor, the doctoral student completes the calendar of scientific activity depending on the announced conferences, publications, inter-university workshops, etc. The doctoral student retains the autonomy of research organization, bearing in mind, however, the need to complete the doctoral dissertation in the eighth semester. The ability to organize work independently is essential in scientific activity (P85-UU/1). It is also one of the conditions that must be met by the author of the doctoral dissertation (Article 13.1 of the Act of 14 March 2003 on academic degrees and academic titles).</p> <p>The program of the doctoral workshop includes the subsequent stages of the preparation of the doctoral dissertation, in particular:</p> <ul style="list-style-type: none"> - developing a plan and calendar of work on the doctoral dissertation - development of the title, theses and outline of the doctoral dissertation - determination of workshop and technical issues for the preparation of the dissertation - organization of access to sources and acquisition of materials <p>Semester II</p>						

The program of the doctoral workshop includes the subsequent stages of the preparation of the doctoral dissertation, in particular:

- analysis of available doctoral dissertations and other publications on related issues
- analysis of the current list of journals and publishing houses scored in terms of possible places of publication of articles
