

Rzeszów 01.10.2020

**To Whom It May Concern**

**Medyk Medical Center** is a family company that has been **providing medical services for over 30 years** under an agreement with the National Health Fund as well as commercially, using experienced and professional medical staff. We have 15 health care centers, 5 occupational medicine clinics, 4 own laboratories and over 30 collection points. Currently, **we provide primary health care for over 55 thousand people**. We are the largest healthcare facility related to workplaces in Rzeszów and the surrounding area.

Through continuous improvement of the quality of services, constant development of our facilities and training of employees, we want to maintain the position of the leading medical care center in the country. We want the current work and efforts of the Medical Center staff to result in the recognition of patients. In addition to professional care, **we also conduct free preventive examinations on a daily basis** in the field of early detection of: cardiovascular diseases, cervical cancer, breast cancer and colon cancer.

Our employees speak many languages: English, German, French, Italian, Ukrainian, Russian and Bulgarian, thanks to which the service of foreign patients is not a problem for us. We also use sign language.

To better serve healthcare needs of **students of the University of Rzeszów**, we offer the following medical services at our clinic at Rejtana 53 in Rzeszów:

**Primary Healthcare****Treatment room with a collection point**

**Specialist offices** (Allergology, Vascular Surgery, Dietetics, Endocrinology, Gastroenterology, Gynecology, Occupational Medicine, Nephrology, Neurology, Neurosurgery, Ophthalmology, Oncology, Orthopedics, Otolaryngology, Proctology, Psychology, Pulmonology, Rehabilitation, Dentistry, Urology)

**Diagnostic tests** (including Audiometry, blood pressure measurement, ECG, Holter, Mammography, X-ray, Spirometry, USG)

**Laboratory tests** (basic and biochemical tests, vitamin value tests, stool tests, markers of inflammatory reactions and rheumatological diseases, diagnosis of coronary heart disease and heart diseases, hematology, serology, sex hormones, infectious tests and others)

**Rapid infectious diagnosis point** (we offer a quick analysis of coronavirus infection with an antigen test, antibodies determined qualitatively or semi-quantitatively test and RT-PCR genetic test, we also have quick diagnostics of CRP, ASO, influenza)
