# ROUGH COMPUTING: Theories, Technologies and Applications

Aboul Ella Hassanien, Zbigniew Suraj, Dominik Ślęzak, Pawan Lingras (Eds.)

IGI Global, Hershey, New York, 2008

This monograph offers the most comprehensive coverage of key rough computing research, surveying a full range of topics from granular computing to pansystems theory. With its unique coverage of the defining issues of the field, this commanding research collection provides libraries with a single, authoritative reference to this highly advanced technological topic.
