# SPECIAL ISSUE ON THEORY AND APPLICATIONS OF SOFT COMPUTING (TASC04)
## Warsaw, Poland, November 2004

**Mariusz Flasiński, Edward Nawarecki, Lech Polkowski, Robert Schaefer, Jerzy Stefanowski, Zbigniew Suraj (Guest Editors)**

This special issue of *Fundamenta Informaticae* contains final, revised and expanded versions of selected papers presented at the Workshop on Theory and Applications of Soft Computing held at the Polish-Japanese Institute of Information Technology in Warsaw in November 2004.

The papers encompass the following topics: multiagent systems, pattern recognition, intelligent systems, transport planning and scheduling, rough sets, Petri nets, and decomposition of information systems.
